LINDHARD PATENT KOMINUTER

KOMINUTERS for granulating.

The latest and highest development in slow speed grinders. Carries 50 % more balls than a ballmill of the same general dimensions; has 52 % more screening surface, and gives 65 % to 85 % more capacity per horse power.

TUBEMILLS for pulverizing.

The Davidsen patented tubemill is acknowledged the world over for its superiority of construction, highest efficiency, highest economy and highest capacity.

ENGINEERING work confined to the cement industry exclusively for the past twenty-five years. Examinations of Properties.

THE "LIFE-AND-DEATH" DEPARTMENT OF YOUR BUSINESS.

You doubtless believe in specialization. You have an experienced man for the machine shop; you hire a foundry expert to start things off in the foundry; before you draw up a form of contract you consult a lawyer; you get an expert accountant to devise your system of book-keeping; when you are sick you send for a physician.

You know that you cannot use your own brains for everything, and that your own experience does not cover everything. You therefore depend for the successful conduct of your business upon YOUR SKILL IN BUYING BRAINS.

The life-and-death department of your business is the sales department. When sales stop the smoke ceases to pour out the chimney and the wheels quit going 'round. But an essential antecedent to selling is making your products and their merits known, CREATING "PSYCOLOGICAL CONDITIONS" IN THE MINDS OF YOUR POSSIBLE CUSTOMERS.

THAT IS MY SPECIALTY.

For ten years I have devoted all my energies to advertising engineering products. I have managed the publicity of such firms as the International Steam Pump Co. and the B. F. Sturtevant Co. I was for a year and a half editor of the Westinghouse Companies' Publishing Department. I now conduct the advertising of the Green Fuel Economizer Co., the Harrison Safety Boiler Works, the Shultz Belting Co., the Strong, Carlisle & Hammond Co.; the Lagonda Manufacturing Co., the Diamond Chain & Manufacturing Co. and others. Read the advertisements of these firms in such papers as POWER, ELECTRICAL WORLD, ENGINEERING NEWS, AMERICAN MACHINIST, etc.

My claim on your consideration is that I can get results economically as against the uncertainty and waste of men of narrow experience. I am an engineer, a member of two of the National Engineering Societies and am able to see an engineering argument and to write upon engineering subjects. I have an organized staff, or machine, for carrying out the details of my work. I have records of results from the many campaigns which I have carried through and full facilities for judging the value of different advertising mediums and different schemes.

If you are interested in making more sales I would be pleased to explain details. It will cost you nothing to talk with me and it may be worth while.

TWO SPLINE BROACH

For Broaching Two Keyways in One Operation.

The Lapointe Broaching Machine

CUTS SQUARE HOLES AND KEYWAYS
RAPIDLY AND ACCURATELY.

This machine is particularly adapted for the Automobile and Machinery Manufacturers, also Wrench and Gun Makers and is suitable for all kind of internal cutting in metal work. Our machines are now in use throughout this country, also in Europe. The No. 2 Machine has a capacity to broach, as large as $1\frac{1}{4}$ square holes, 4 in. long, taken from a drilled hole or cut $\frac{1}{2}$ in. keyways in a hole 6 in. long, in one operation, consuming about two minutes.

The No. 3 Machine has capacity to broach, as large as 2 in. square holes, 8 in. long taken from a drilled hole; or cut $\frac{3}{4}$ in. keyways in holes 8 in. long in $2\frac{1}{2}$ minutes. The work requires no fastening or clamping to the machine and is not exposed to be mutilated.

Our business is building broaching machines and making broaching tools of all description. We are specialists in the above.

If you have any work in the line of broaching holes or cutting keyways, just let us tell you what we can do for you. Send blue prints, sketches or samples for estimates of cost and tools required and same will receive our prompt attention.

SQUARE BROACH

LAPOINTE'S PATENTED SYSTEM
Simplest and most rapid method for cutting internal keyways, straight, taper or dovetail, and oil channels, also for broaching square or hexagon holes, from cored or drill holes.

Adjustable Reamers and Taps

LAPOINTE ADJUSTABLE REAMER

LAPOINTE TOOL SUPPORT

(BOTH PATENTED)

THE LAPOINTE REAMER SUPPORT

The *Lapointe Arbor Support* has many advantages over former methods of holding Reamers in Turret Machines when accurate work is required. The support or bushing is held firm in the turret at the same time leaving the Arbor "floated."

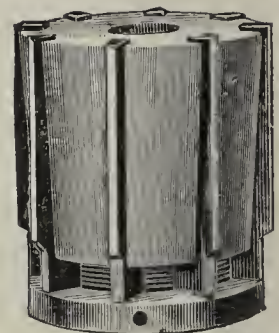

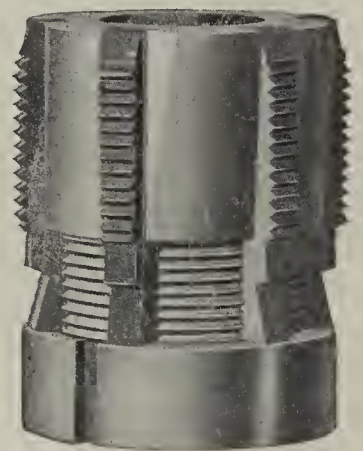

ADJUSTABLE HAND REAMERS

DO YOU BUY TOOLS AND SUPPLIES?

Then get a copy of the **MACHINE TOOL POCKET LIST**.

It is a comprehensive, classified index of tools and supplies and of the people who manufacture and sell them. It will save you many dollars' worth of time when you are looking for "who makes it." It is up to date. It is issued quarterly and every new machine or device is listed as soon as the maker lets his new product be known. The insertion of a maker's name is not contingent upon advertising.

Why waste hours hunting or writing around for catalogs or be pestered by hordes of salesmen who have what you don't want when all the products of *all the concerns in the United States that manufacture machine tools are accurately and fully classified in this book?* For instance, the postage you would waste in writing to all the lathe manufacturers when you might want only a particular kind or size of lathe would more than pay for the **MACHINE TOOL POCKET LIST** for a year and the list would enable you to find just the firm you wanted at once. Besides this, the list contains an alphabetical classification of manufacturers of machine tools and supplies, which will be a convenient mailing list some day when you want to circularize these people.

HEAR WHAT PEOPLE SAY ABOUT IT.

"Almost indispensable"—J. STEVENS ARMS & TOOL CO.

"Will save us lots of time"—PRATT & WHITNEY CO.

"A great convenience"—JOS. REID GAS ENGINE CO.

"Of inesfimable service"—ADAMITE ABRASION CO.

"A very handy book"—MANNING, MAXWELL & MOORE.

"Beyond anything that has ever been published"—NILES-BEMENT-POND CO.

"A convenient book"—NORTHERN ENGINEERING WORKS.

"A very handy index"—CANTON DROP FORGING & MANUFACTURING CO.

"A very handy reference"—WILLIAMSON MANUFACTURING CO.

"Very handy and complete"—SCHWERDTLE STAMP CO.

"Wish to compliment you on the new method of reference"—WATSON-STILLMAN CO.

"We like the idea"—SILVER MANUFACTURING CO.

THE MACHINE TOOL POCKET LIST costs \$1.00 per year. Any brand of legal tender is accepted.

The worst leak of all in a manufacturing plant is in the transmission of power from the engine to the machines due to faultily designed drives and cheap

POWER TRANSMISSION MACHINERY

poorly erected. Preventing or stopping this leak is our specialty. We make the plans; make the material and do the erecting.

Machinists & Founders

Star (*) indicates Machinists.
Dagger (†) indicates Founders
Star & Dagger (*†) indicates Machinists & Founders.

Section Mark (§) indicates Brass & Composition Founders.

All manufacturers of Machinery, Castings, etc., who have a machine shop or foundry are classified under this heading and sub-classified in other parts of the book under the specific article they produce, such as:

Agricultural Implement Mfrs.
Brick Machinery, etc.
Cars, various kinds.
Cast Iron Pipe, various kinds.
Castings, various kinds.
Cranes, various kinds.
Drills, various kinds.
Dynamos & Motors.
Elevators.
Engines, various kinds.
Flour Mill Machinery.
Founders, Malleable Iron.
Gears, various kinds.
Grinders, various kinds.
Hammers, various kinds.
Harrows, sub-classification of Agricultural Implements.

Heaters, Steam & Hot Water.
Ice & Refrigerating Machinery.
Lathes, various kinds.
Mining Machinery.
Paper & Pulp Mill Machinery.
Plow Mfrs., sub-classification of Agricultural Implements.

Plumbers' Brass Goods.
Presses, various kinds.
Radiator Mfrs.
Rolling Mill Machinery.
Saw Mill Machinery.
Special Machinery.
Steel Structural Work.
Stove Mfrs.
Textile Machinery.
Valve Mfrs., various kinds.
Wheels, various kinds.
Woodworking Machinery, and hundreds of other articles too numerous to mention.

For correlative trades not included under head of Machinists & Founders see:

Automobile Builders.
Boilers, Steam, etc.
Bolt & Nut & Rivet Mfrs.
Bridge Builders, Steel.
Chains, various kinds.
Cutlery Mfrs.

Forgings, various kinds.
Furnace Mfrs., Hot Air, etc.
Gas Machines, various kinds.
Gas & Electric Fixture Mfrs.
Hardware Mfrs.
Nuts, various kinds.
Rolling Mills & Steel Mfrs.
Saw Mfrs.
Screw Mfrs.

For all other kindred classifications consult

NEW YORK CITY

(SEE NEXT PAGE)

THE MYCENIAN MARBLE CO.

developed the processes and originated the
ARTIFICIAL MARBLE business in this
country.

Its product closely resembles both coloring
and veining of the natural marble, it is vastly
superior to the crude work of others and is
universally accepted as the Standard.

It has no connection or affiliation of any
kind with any other concern.

AUSTIN PIPE ORGANS

OUR AIR CHEST

is an air-tight room, filled with air, on which all the pipes stand, and are fed directly and individually. It can be entered at will by means of air-tight doors, even while the organ is being played. All parts are exposed to view, and are readily accessible.

OUR ACTION

is absolutely reliable in repetition and instantaneous in response, whether tubular or electro-pneumatic, and is unaffected by atmospheric changes, even in the most trying climates.

OUR TONE

is achieved by a scientific system of voicing, worked out after long, careful study and tests, producing a most artistic, full, rich and dignified tone.

OUR CONSOLE

is most modern, simple, practical and convenient for the organist.

A Few Notable Four Manual Austin Organs.

Cathedral of All Saints, Albany, N. Y.
Temple Auditorium, Los Angeles, Cal.
St. Vincent Archabbey, Beatty, Pa.
St. John the Baptist Church, Manayunk, Pa.
Concert Hall, John Wanamaker's N. Y. Store.
Jamestown Exposition, Norfolk, Va.
First Presbyterian Church, Seattle, Wash.
St. Stephen's Episcopal Church, Wilkes-Barre, Pa.
First Church of Christ, Scientist, Denver, Col.

We use the same system and materials in our smaller work as in our larger instruments.

Write for Descriptive Book "R" giving list of Organs and full particulars of our system.

ZIBELL'S ANTI-RUST COATING (any color), tough, tenacious, weatherproof, unaffected by
 frost, rain, salt air, gases and acid fumes; prevents rust and corrosion on structural
 and ornamental iron; also on all metal surfaces. Lasts indefinitely.

BLACK PROTECTORINE, used on inside of weather exposed walls, eliminates furring and
 lathing.

ZIBELL'S WATERPROOF PAINT, impervious, sunproof, frostproof, rainproof and weather-
 proof. Efficiency guaranteed.

OUR SPECIALTY: Difficult dampproofing and waterproofing problems seemingly impos-
 sible of solution. We guarantee results.

ROOT SPIRAL RIVETED PIPE LISTS, SUBJECT TO DISCOUNT.

All prices and weights are figured per 100 lineal feet, in four 25-foot lengths if **ASPHALTED**, or in five 20-foot lengths if **GALVANIZED**. Shorter lengths involve additional joints and increase the price. For water pressure up to 100 lbs. we advise the use of regular pressure pipe gauges, as printed in bold face type. We list below only regular and extra heavy pressure pipe gauges. For complete lists see our Hydraulic Handbook No. 39, mailed postpaid on request.

Strong Testimony for Root Spiral Riveted Pipe

453 THIRD STREET, BROOKLYN, N. Y., Feb. 10th, 1906.

ABENDROTH & ROOT MFG. CO., NEWBURGH, N. Y.

GENTLEMEN—In connection with my recent inquiry for spiral piping you will probably remember me as having installed the pipe line at Tegucigalpa, Honduras, in company with G. W. Gibson now of Denver, under the firm name of Gibson & Cole.

This line is over twelve miles in length, and the height of head above the city over two thousand feet. In one place the pipe, 8 in. in diameter and of No. 18 gauge, is, I think, under a head of 800 feet where the pipe crosses a valley.

No part of the pipe ever showed any signs of weakness through poor material or workmanship.

All the joints were made with your patented joint, the interior sleeve with the two rubber bands and the glands held by through bolts. (The Root Bolted Joint.)

The pipe in shipment from New York was subjected to very rough treatment, being re-shipped so many times going across the Isthmus of Panama, then on steamer again up the coast to Amapala, then by barges to the main land, and then by carts some ninety miles to Tegucigalpa. Exposed to the hot sun and the loading and unloading, the asphalt covering was scraped and torn off; this we had no means of replacing, but laid it just as it came. Also the line is laid in many places above the ground for half a mile or so, uncovered. It never freezes there, you know.

The other day I was talking with my partner, Gibson, about this pipe line, and he tells me only a month ago he saw a man direct from Tegucigalpa who told him the line was in perfect condition and delivering water as well as when first laid fifteen years ago.

The only damage the pipe has ever sustained was during one or two of those periodical revolutions, when one or other of the revolutionary parties broke the line and so cut the water off from the city; but a length or two of new pipe made the whole as good as new.

I would especially commend the joint you furnished for tightness, ease in putting together and above all its flexibility, as we could frequently put together lengths of a hundred feet or more on the edge of the ditch and then lower it into place or bend it around rocks or obstructions with no damage to the joint when made up, making quite a saving in excavating and not requiring the bottom of the ditch to be carefully leveled.

From practical experience I can most assuredly recommend your Spiral Riveted Pipe for durability under rather trying conditions, and shall be pleased to give you any further information in my power, should you so desire.

Yours truly,

H. W. N. COLE, M. E.

Root Spiral Riveted Pipe is not a makeshift, nor is its popularity due alone to low first cost. Hundreds of pulp mills and municipal water works in this country and abroad contain installations which, after twenty to thirty years' of service, are still in a perfect state of preservation.

METAL CORNER BEADS

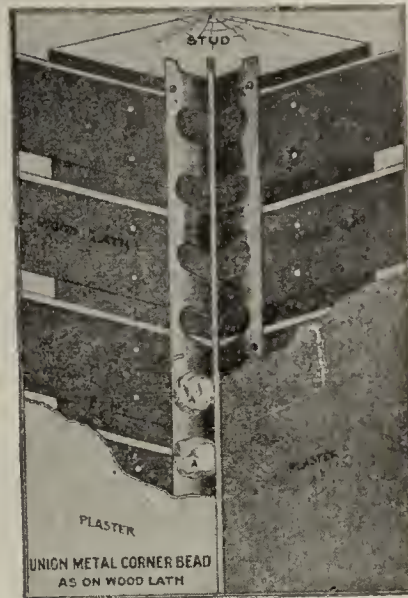

For Plaster Corners on Wood, Brick, Terra Cotta and Iron.

These Beads can be arched to fit any desired radius; it makes a true curve for the plasterer to work by, saving time and labor.

Broken and chipped-off corners are unknown in buildings where this bead is used—makes a handsome, durable, fireproof corner.

It is not expensive. It is cheaper to put corner bead in your building than leave it off, because it makes a true corner and a plasterer can proceed with his work and not stop to use a straightedge, which is necessary on plaster corners. Something new: We manufacture the Goodwin Clip Bead, the finest clip bead on the market.
